## Oil and mining are rich resources for National Growth.

Kenya's growth potential is being further enriched by oil discovered in Turkana and elsewhere. This presents new possibilities for the economy as well as business in general. Also, Kenya's mining sector has been growing by a steady 4.5% in recent years. Recent discovery of rare earth minerals like copper, titanium niobium as well as rare gemstones have given mining a big boost. National Bank is once again, at the very hub of these activities, and the nation's growth will be integral to National Growth.
