About Yudiz :

Yudiz is a software development company with its core focus on enterprise mobility and web based solutions. In coherence with the spirit of innovation and creative spurt, we believe in thinking beyond the convention and we strive to give the best to our clients as their technology partner.

We aim at providing an extraordinary outsourced software development experience which helps the organizations to adapt to the changing market demands. Our high quality and cost effective development services will help you reduce your technology costs and also improve your delivery metrics thereby helping you to offer better customer services to your clients through the systems and service solutions that we develop for you.

OUR MISSION & VALUES

HIGHEST QUALITY SERVICE

We trust in Integrity, Innovation and Performance. We aim at offering top notch services that will bring our customers back for more work and we understand that this would be possible only by offering quick services through our effective communication channels and also by offering highly reliable services that guarantee high success rate for businesses.

BEST CUSTOMER FOCUS

We aim at growing the business of our clients with consistent profitability. We believe in maintaining everlasting relationships with clients and provide high focus to all the projects without any differences. Each and every client is more important to us and we aim at delivering the project as per the agreed terms We are basically here with an intention to provide cost-effective and quality IT services to our partners and various online business enterprises which will help them to increase their return on investment

TOP MOST EMPLOYEE SATISFACTION

At Yudiz, we understand that it is the people within the organization that can make a company better and help the company and our clients grow. Hence, we sincerely work towards keeping our employees happy and comfortable, in order to make them successful. We believe in creating a work atmosphere that can facilitate a growth graph where each and every employee can better themselves in terms of monetary gain, career, knowledge and skills related to the job. We believe in providing a conductive work environment to employees to bring out the best in them. We encourage work related innovative inputs and creative ideas from the team members. We also have schedules for seminars or webinars to facilitate greater exposure to dynamic technology.

Mobile Strategy

With wide spread usage of mobile devices it is very important that the enterprises adopt a definite mobile strategy. Being a pioneer in the mobile app development domain, we offer right consultation, development and mobile app marketing services that will ensure that you expand and remain connected to your prospects through the right mobile strategy.

Content / Information Management

Content and information management solutions to keep your apps dynamic. You can now manage your mobile apps and websites yourselves thereby avoiding the recurring costs of maintenance.

User Experience (UX)

We totally understand that the market these days are very competitive and there are many enterprises offering the same services/solutions. Hence to give you an edge, we offer apps that have a rich User Interface (UI) and we see to it that they keep your users engaged and give them a great User Experience (UX)
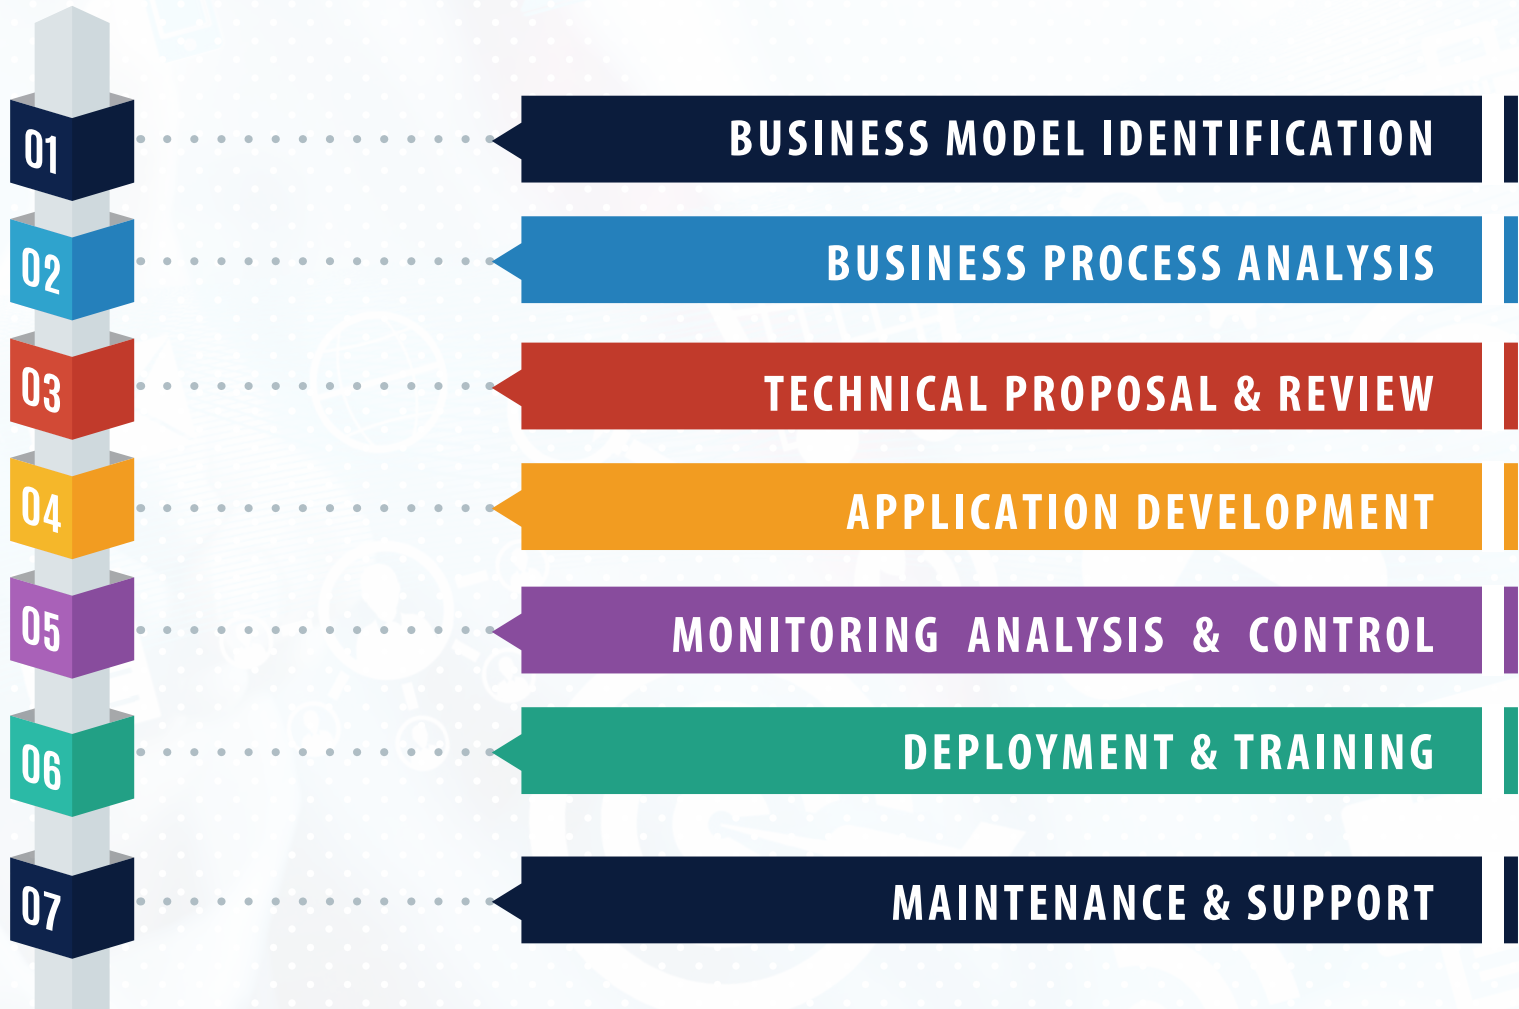

Scalability of Solution

At Yudiz, we understand how important it is to develop an IT solution which is futuristic. We make sure that the solutions which we offer are scalable and have the complete possibility of expansion.

DESIGN

India has been a favourite outsourcing destination for IT development. Our business model revolves around the concept of offshore development centre where we offer our skilled IT resources to the enterprises thereby helping them to reduce over 60% of their development costs. Availability of ready infrastructure and veterans with cross technology expertise makes the development process easy, efficient and cost effective.

FIXED PRICE MODEL : This model is best suited when the project scope is well defined. It is a perfect fit for small and medium businesses and entrepreneurs who have fixed objectives for their project. In this model Yudiz would enter into an agreement with the client where the scope, budget, and deadlines are clearly defined.

TIME AND RESOURCE MODEL : This engagement model is a right choice when your project is complex on one hand and time and resource bound on the other. In time and resource model, you can hire our highly experienced resources on an hourly basis and get them to work on your project as per your business requirement. The salient feature of this model is that it offers flexibility to manage your tasks and resources easily.

HIRE A DEDICATED DEVELOPMENT TEAM : This is a model that you can opt for if you want to set up a complete offshore development team. This is a most preferable model when you do not want to maintain an in-house team for your project. You can hire an entire team of dedicated programmers or developers to work on your project. The dedicated team at Yudiz would be an extended part of your company. The development team will be working closely with you as if they were your own employees but just with a difference that they work from our offshore development centre.
