Monika Shrivastava
Graphic Designer

Throughout my career, I have always tried to ensure that the passion and enthusiasm for my work has shone through. Communication and understanding of the project means I can solve the brief to the best of my abilities, guaranteeing that key ideas are executed properly and efficiently.

I genuinely believe that I take a positive and enthusiastic approach in all my work. Each project is engaged in with professionalism to allow my creativity and passion to be expressed. I have learnt that having a platform to question and further ideas harnesses greater creativity - although realizing creative inspiration doesn't come without its obstacles! Obstacles such as time management and working to tight deadlines are important in any industry, but the foundations and biggest challenges of Design lie in communication.

In all my work, I have relished these challenges and used them to fuel my ambition and maintain my own high standards. I would like to face any type of challenge providing 100% satisfaction. I believe Creativity, Skills and Professionalism are the three most important qualities a professional needs and I will try to fulfill all of them. My projects show my dedication and professionalism towards work.

Netmiz - 'Network optimized' is an innovative and patent pending app that allows you to expand your professional and social network wherever you are. Imagine yourself in a new environment (at an event, in a hotel abroad, in a new city, at an airport, or at Masai Mara park – where the idea came from!), there is certainly someone else in your surroundings sharing the same interests as you, but you may never interact - this is a missed opportunity to expand your social and professional network.

Lutin Rouge helps childcare directors and teachers manage their young classrooms. Save time and throw out that paper. Track attendance, snaps, meals and breaks for an individual or the entire classroom. Instead of writing the same thing on 20 daily reports, enter it once!

Note: This app is for client's personal use only.

DocScanner turns your phone into a multipage scanner for documents, receipts, notes, whiteboards, and other text. With Doc Scanner, you can quickly scan your documents and store or email them as multipage PDF or JPEG files. Doc Scanner uses advanced fast algorithms to auto-detect document edges, straighten the documents (correct perspective). You can get instant one-tap brightness, rotation and color controls all on one screen!

Present Buddy has been designed by Mum's for Mum's! It has been created to take some stress out of holding a birthday party and is an easy solution for guests to buy great presents for child's birthday. Users can avoid getting endless phone calls for gift ideas and unwanted presents by downloading this simple app. In this app users can upload a list of gift ideas to make it easy for guests to buy presents, the chosen gift is then removed from the list resulting in no more double ups. The app is free for guests and very easy to use. They are also able to send RSVP directly from the 'Present Buddy' app, which results in saving time.
