JCB DIESELMAX ENGINE

www.jcb.com

JCB DIESELMAX 672 Engine: This 6 cylinder, 7.2 litre engine is a Heavy Duty design, specifically for off highway applications. It provides exceptionally high torque at low engine rpm, while also utilising the latest ecoMAX lean-burn combustion technology, to ensure reduced emissions and greater efficiency.

Download the JCB AR App from
Google Play Store / App Store
Point your device at the engine and be surprised!

Scan the QR code with your phone
using QR code scanner / reader
and be surprised!

Experience more with the JCB AR App!

By downloading this free app on your smartphone or tablet (iOS or Android), you can bring photographs to life, using the power of a new technology called Augmented Reality (AR). To access bonus content, simply follow the easy steps:

1

Download the JCB AR App from
Google Play store or
App store.

2

Open the app with a simple tap.

3

Point your device at the photos where you see
the AR content and be surprised!
Double tap for a full-screen image.

Experience more with the QR Code!

1

Scan the QR code
with your phone using
QR code scanner / reader.

2

In case you don't have a QR code scanner / reader in your phone:
For Android - Visit Google Play store, search for QR code scanner / reader, and download.
For iOS - Visit App store, search for QR code scanner / reader, and download.

ACC Today

ACC Limited, formerly The Associated Cement Companies Limited, or just ACC as it is popularly known, is India's foremost manufacturer of cement and concrete. ACC's operations are spread throughout the country with 14 modern cement factories, 13 Ready mix concrete plants, 19 sales offices, and several zonal offices. It has a workforce of about 9000 persons and a countrywide distribution network of over 9,000 dealers. ACC has a unique track record of innovative research, product development and good corporate governance. Since its inception in 1936, ACC has been a trendsetter and benchmark for the cement industry in respect of its production, marketing and personnel management processes. Its commitment to environment-friendliness, its high ethical standards in business dealings and its on-going efforts in community welfare programmes have won it acclaim as a responsible corporate citizen. ACC has made significant contributions to building a modern India.

Built with ACC Cement ...

60 years' celebration

... still going strong

ACC's Head Office – CEMENT HOUSE – whose address used to be 1, Queen's Road, Churchgate was completed in 1943. An all-India competition invited leading architects of the time to send in their designs of which this one conceived by M/s. Ballardie Thomson & Matthews was chosen as the winning entry by an eminent panel. This stately building was requisitioned by the Royal Air Force in 1943 and vacated only in November 1946 after the War period.

Blended Cements from ACC In Harmony with the Earth

The concentration of Carbon Dioxide, the primary green house gas, has risen by 50% in the 20th century. Carbon dioxide is a major product in the manufacture of two of the most important materials of construction- Portland Cement and Steel. The world's Portland cement production has risen from barely 2 million tonnes early last century to 1.3 billion tonnes in 1996, and over 1.5 billion tonnes currently.

Each tonne of Portland cement requires around 1.5 tonnes of limestone and considerable amounts of fossil fuels and electrical power. The production of 1 Tonne of Portland cement clinker is accompanied by approximately one tonne of carbon dioxide.

The goal of sustainable development in cement and concrete industry can be advanced if a serious effort is made towards complete utilization of the cementitious and pozzolanic byproducts of our thermal plants and metallurgical industries. ACC has already led the way with as much as 85 % of its total production comprising these environment friendly 'green' cements.

KEEP AN EYE ON ALL ANYWHERE!

TryLink-enabled network cameras were designed to be installed by people that you know can easily and quickly connect to your home or office, making setup simple. And, unlike previous smart IP video, mobile video cameras make it so easy to capture pictures & videos and you are in control to see the video feeds or capture pictures to share with family and friends.

Think home/office surveillance is too difficult to set up? Think again.
