

# Integration Salesforce with Google Drive to synchronize Files and Opportunities:

## Functionality:

- 1> Connected **Salesforce** and **Google Drive** to take all **Files** from Google Drive to Salesforce.
- 2> As per your requirements you can save it in your **different objects**.
- 3> You can also **downloads** those files from Salesforce after save.

**Examples:** I am taking **Salesforce Image** from Google Drive and save into **Opportunity object** in Salesforce.

Please go though the screen shots attachments to understand the scenario more.

The screenshot displays the Salesforce user interface. At the top, the Salesforce logo and a search bar are visible. The navigation menu includes Home, Reports, Dashboards, Chatter, Cases, Leads, Accounts, Contacts, Orders, Opportunities (highlighted), Products, Open\_Positions, TerritoryPostCodes, and as. The left sidebar shows a 'Create New...' button and a 'Recent Items' list containing various records like 'test6', 'uu', 'salesforce', and 'triggerclasscheck'. The main content area shows an 'Opportunity' record titled 'test6'. Below the title, there are options to 'Hide Feed' and 'Click to add topics'. A 'Post' button is visible, and a file upload dialog is open, showing a 'salesforce' file with a 'Change file' option. The text 'Hey' is entered in the post field. Below the text field is a rich text editor with formatting options (B, I, U, S, I\_x) and a 'Share' button. The bottom of the page shows 'Opportunity Detail' with 'Edit', 'Delete', and 'Clone' buttons.
