

Developing a trigger which update Contact object field corresponding Job Object.

Functionality:

When a Candidate apply for a job in **Job Application object** and taking Candidate name from **Contact object lookup** and also taking Job title from **Job object lookup** and click the Save Button, corresponding to the “**Job Category**” field in **Job object**, **Contact field “Business Sales Status”** update automatically in the same time.

Example: Mr. Optimized apply for **Finance Manager Post**. Corresponding to the **Job Category** field value **Business Sales-Financial Planning** in Job object, Contact object **Business Sales Status** field automatically update by **Financial Planing Buyer**.

Please go though the screen shots attachments to understand the scenario more.
