

# Developing Wizard Controller VisualForce Page:

## Functionality:

- 1> Creating 4 VisualForce pages.
- 2> **Account, Contact, Opportunity** details are showing in another page. Here I also create some buttons which help to come back any of the three objects (**Account, Contact, Opportunity**) and come back in detail page.
- 3> Also here have 3 Buttons:
  1. **Previous Button**: Use to go '**Previous Page**'.
  2. **Next Button** : Use to go '**Next Page**'.
  3. **Review Button** : Use to '**Review**' the page details

Please go though the screen shot attachment to understand the scenario more.
