

Reshaping the future of denim.

**INDIGO**  
Towards The Brighter Blue

Donate Plastic bottles and old cloths to get discount vouchers of upto 30%.

**R&D Team**

We have a Research & Development team that strives to create earth fit denims.

**Upcycle**

We Upcycle used denims to create stunning pair of vintage pieces.

**Recycle**

worn out jeans are shredded and blended with virgin cotton to produce new denim yarns.

**Laser Treated Denim**

Laser technology is used for denim finishes reducing the use of water and toxic chemicals.

**Air Cleaner Denim**

Coating denim with TiO2 particles, to remove harmful emissions from the air.

Indigo is dedicated to transform the denim industry into a more sustainable, innovative and collaborative industry. Our mission is to take denim 'Towards a Brighter Blue' through education, innovation and collaboration projects, we aim to reduce environmental impact and stimulate adoption of more sustainable innovations.

**Avail Discount!**
