Objectives

Throughout my career, I have always tried to ensure that the passion and enthusiasm for my work has shone through. Despite my success as an independent designer, I have found that it is through a team that I have achieved my greatest potential. I have learnt that having a platform to question and develop ideas harnesses greater creativity - although realising creative inspiration doesn't come without its obstacles! Time management and working to tight deadlines are important in any industry, but the foundations and biggest challenges of design lie in communication. In all my work, I have relished these challenges and used them to fuel my ambition and maintain my own high standards.

Education

Bachelor of Science in Interior Design **University of San Agustin**

Interior design is the art and science of enhancing the interior of a building to achieve a healthier and more aesthetically pleasing environment for the people using the space. An interior designer is someone who plans, researches, coordinates, and manages such projects.

Bachelor of Science in Mechanical Engineering **Western Institute of Technology**

Mechanical engineering is the discipline that applies engineering, physics, engineering mathematics, and materials science principles to design, analyze, manufacture, and maintain mechanical systems. It is one of the oldest and broadest of the engineering disciplines

Bachelor of Science in Mechanical Engineering **Major in Automotive Engineering** **Iloilo Science and Technology University**

is a branch of vehicle engineering, incorporating elements of mechanical, electrical, electronic, software and safety engineering as applied to the design, manufacture and operation of motorcycles, automobiles and trucks and their respective engineering subsystems.
