

ios 11 UPDATES

An overview of all the changes made to Apple's latest OS in updates 11.1 and 11.2*

ios 11.0

iOS 11 sets a new standard for Apple's mobile operating system. It makes the iPhone better than before and the iPad more capable than ever. And now it opens up both to amazing possibilities for augmented reality in games and apps.

According to Apple –

“With iOS 11, iPhone and iPad are the most powerful, personal and intelligent devices they’ve ever been.”

ios 11.1 (stable)

iOS 11.1 was released that corrected the following main issues:

- » Issue with keyboard auto-correct
- » Issue where Hey Siri stops working

It also added a bunch of new emojis.

Within a week after that, Apple released iOS 11.1.1.

Apple has confirmed that it only contains minor bug fixes. There have been security updates so far.

ios 11.2 (beta)

iOS 11.2 is currently in its third beta version. It has so far brought in following changes:

- » Faster wireless charging for iPhone X and iPhone 8.
- » Apple Pay Cash included.
- » Calculator bug fixed.
- » Support for AirPlay 2 devices added.
- » Visual changes to Apple Music app and the Control Center.

We are also expecting a major security update in the next (stable) version of iOS 11. Hopefully it will be released soon.

As of the time of making this infographic (15th Nov, 2017), iOS 11.2 was only available as Public Beta.
