Gtext Homes - Jan 17
Iroko Interiors - Oct 18

Skills

Adobe Photoshop
Autodesk Revit
Lumion
Vray - Chaos Group
Office (Word,Excel,Ppt)
Arnold - Solid Angle
Autodesk Maya
Google Sketch up pro
Dynamo For Revit

Interests

As a designer i am open to learning and to explore. My core interest are in parametric and abstract designs. I symphatize very well with minimalism

Advantages

As always can be put to the test, i am a guru of hardwork, dedication and knowledge. I believe these three characters are more prefarable to acquired skills, which i poses

CONTENTS ►

A LIVING SPACE IN SPACE

A LIVING SPACE

The concept aims to prevent the feeling of isolation and brings a sense of togetherness

This explains the round-like arrangement of the interior where spaces face each other, but still have its privacy.

In this idea, there would be vast use of colours of the natural environment like yellow, green, brown, also the use of light wood material, this creates more sense of activity in the space and would emphasize on the idea "a living space"

THE OFFICE

The office feature a hexagonal like finish on the floors and the ceiling, sort of a "honeycomb" finish emphasizing the sense of activity in the space

All Furnitures are designed to specification, the idea is to create a feel of balance, thus the use of only rectilinear forms

MINIMALISM

My ways of
expressing
perspective
views

These rendered
images show how i
understand the use of
balance, scale &
proportion, in
interior design

DOWN TO THE CONSTRUCTION

“Design is a plan for arranging elements in such a way as best to accomplish a particular purpose.” – Charles Eames
I plan to express elements like gravel to foster a natural feel and i like the creativity the use of wood brings to an interior space

The challenge of space constriction is something I can always take on, seen the give square are, the use of a kitchen island is eliminated, the alternative is to rest the cabinets on the walls. There is led lighting and point light systems. Each cabinet has been designed to specification and the importance of balance, scale, proportion & rhythm has been executed

Lost lounge & bar design is inspired by the beauty & feeling when viewing the sunset

The design compromises of natures tones and unique elements

The design aims to improve the customer patron experience that it is okay to feel lost in the space

LED

WALL & CEILING LIGHTS

LED Lighting on furniture

Suspended Ledram Ceiling Lights

Mimics the same as to looking at the moon.

Elevations

Elevations

Ceiling Plan

materials like marble, brass, wood and concealed lighting to embed linear and curvilinear design elements in the conceptual plan were used to pull in the eyes and give a sense of comfort.

The design concept for sterling bank persuades the user of the space to think about endless possibilities.

THE RISING SUN

MIA CASA RESIDENCE

Contemporary as it speaks.
The design aims to eliminate
the rational behind “luxury
having to be expansive”.

Every room stands
out. It tells you a
story

Mia Casa Residence ...in construction
