

ALAN

UNWANTED WANTS

I am a self taught digital artist, traditional artist, concept artist, illustrator and textile artist. Ever since I saw my mum paint at 5 years old, right before I picked up a pen to draw, I have always seen the universe as art. Art is what brings beauty and substance to the world, without art there will be nothing apart from breathing in and out which in todays world isn't regarded as the soul purpose to life. This is why inspirations aren't hard for me to find, because since the universe is art then everywhere I look I get inspirations, so I like to study, travel, make fashion designs, watch cartoons, watch movies, watch anime, take random pictures to preserve inspirations. I avoid being messy in my works, that is why I don't settle for less until I have satisfied myself with the final detailing. I believe I can do everything and anything that is why I try to expand my reach everyday, this touches both my art and everything I do. Im working hard to reach my goal: being an inspiration in the art world and growing with other talented and creative people.
