Employment History

October 2015 – Present.

BNY Mellon Technologies, Pune

Senior Application Developer

As Senior Application Developer for Pershing Technologies my responsibility is to develop and support Finance based projects in NetX360 application for US, U2 based clients. NetX360 delivers a rich experience and broad flexibility that lets you adapt to the changing ways investors want to do business now and in the future. With NetX360, clients can:

- Get instant access to account information and view statements and trade confirmations online
- Access quotes and news from leading sources plus research on thousands of stocks, options and mutual funds

- Quick views of summary or detailed account information

Responsibilities

- Interaction with Business to understand Project requirements.
- Overall layout design, color scheme of the web sites and web applications using HTML5, CSS3 & JavaScript.
- Developing a web based applications in JavaScript, HTML, CSS, Java and Spring based on the client requirements.
- Performing functional test cases on web application to find bugs/defects.
- Designed and converted the mock-ups into HTML, CSS & JavaScript.
- Time to time resolving incidents reported in NetX Application along with build activities on Jenkins.
- Monitoring servers for heavy load traffic on US trade hours and managing production MMs along with Executing MMs related activities.
