ABOUT ME

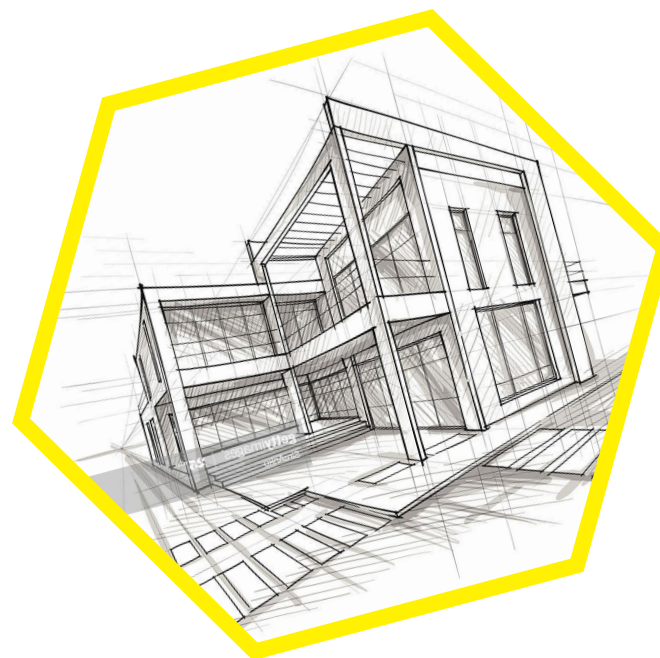

My name is Brian Wambugu Muchiri a second year student in interior design architecture at Nairobi Institute Of technology. I also hold a certificate in interior design from BuruBuru institute of fine arts .

skills

Archicad software

Graphic design

Generating floor plans from scratch .

Brian Wambugu

Office Space Design

I was tasked to redesign our Nairobi Institute Of Technology hall to a Telkom customer experience center and here is a recap of the design from the concept board ,floor plan both working and presentation drawings ,sections and detail drawings of my design .

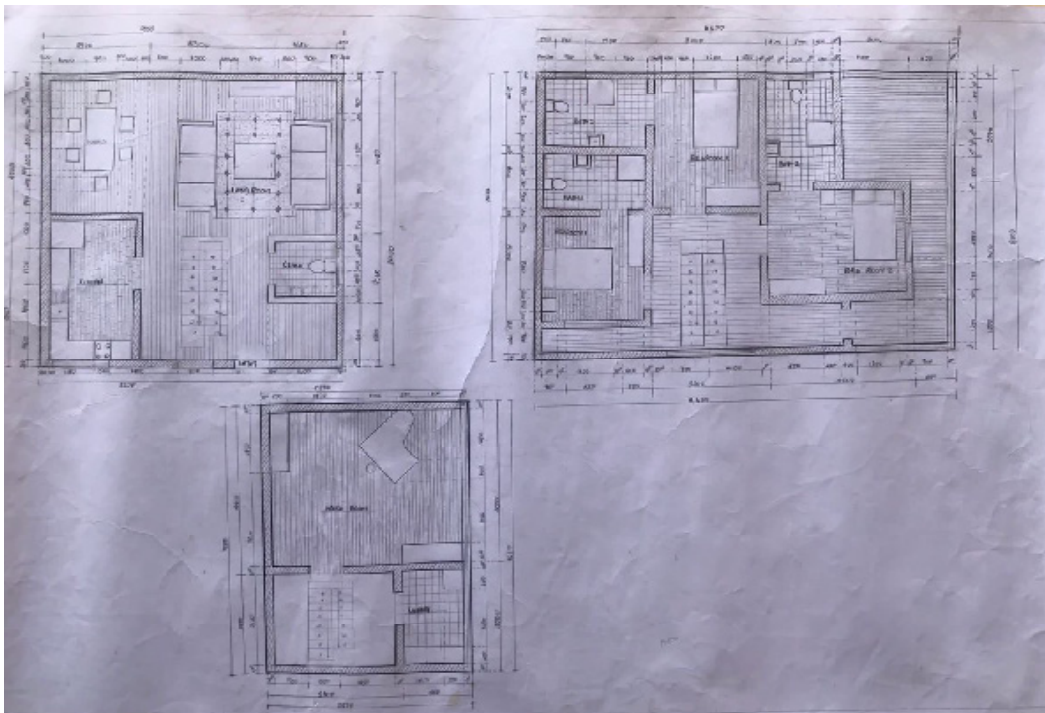

CONCEPT BOARD

CONCEPT
 Telkom rebranded in 2017 from orange .The main reason for this move was to market them selves .Their slogan is moving with you,and in their logo on the letter K and O there are arrows that show movement

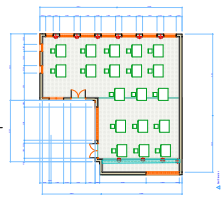

INSPIRATION
 The inspiration on my project will be from the arrow symbols that show movement.The arrows also show movement on steet lights and were used to explain more on the telkom slogan moving with you .

Residential Space Design

In architecture ,design is not limited with the arrangement of furniture or lighting fixtures .To archive good results ,every detail should be captured and the correct choice of color to archive the aesthetic value of a building .

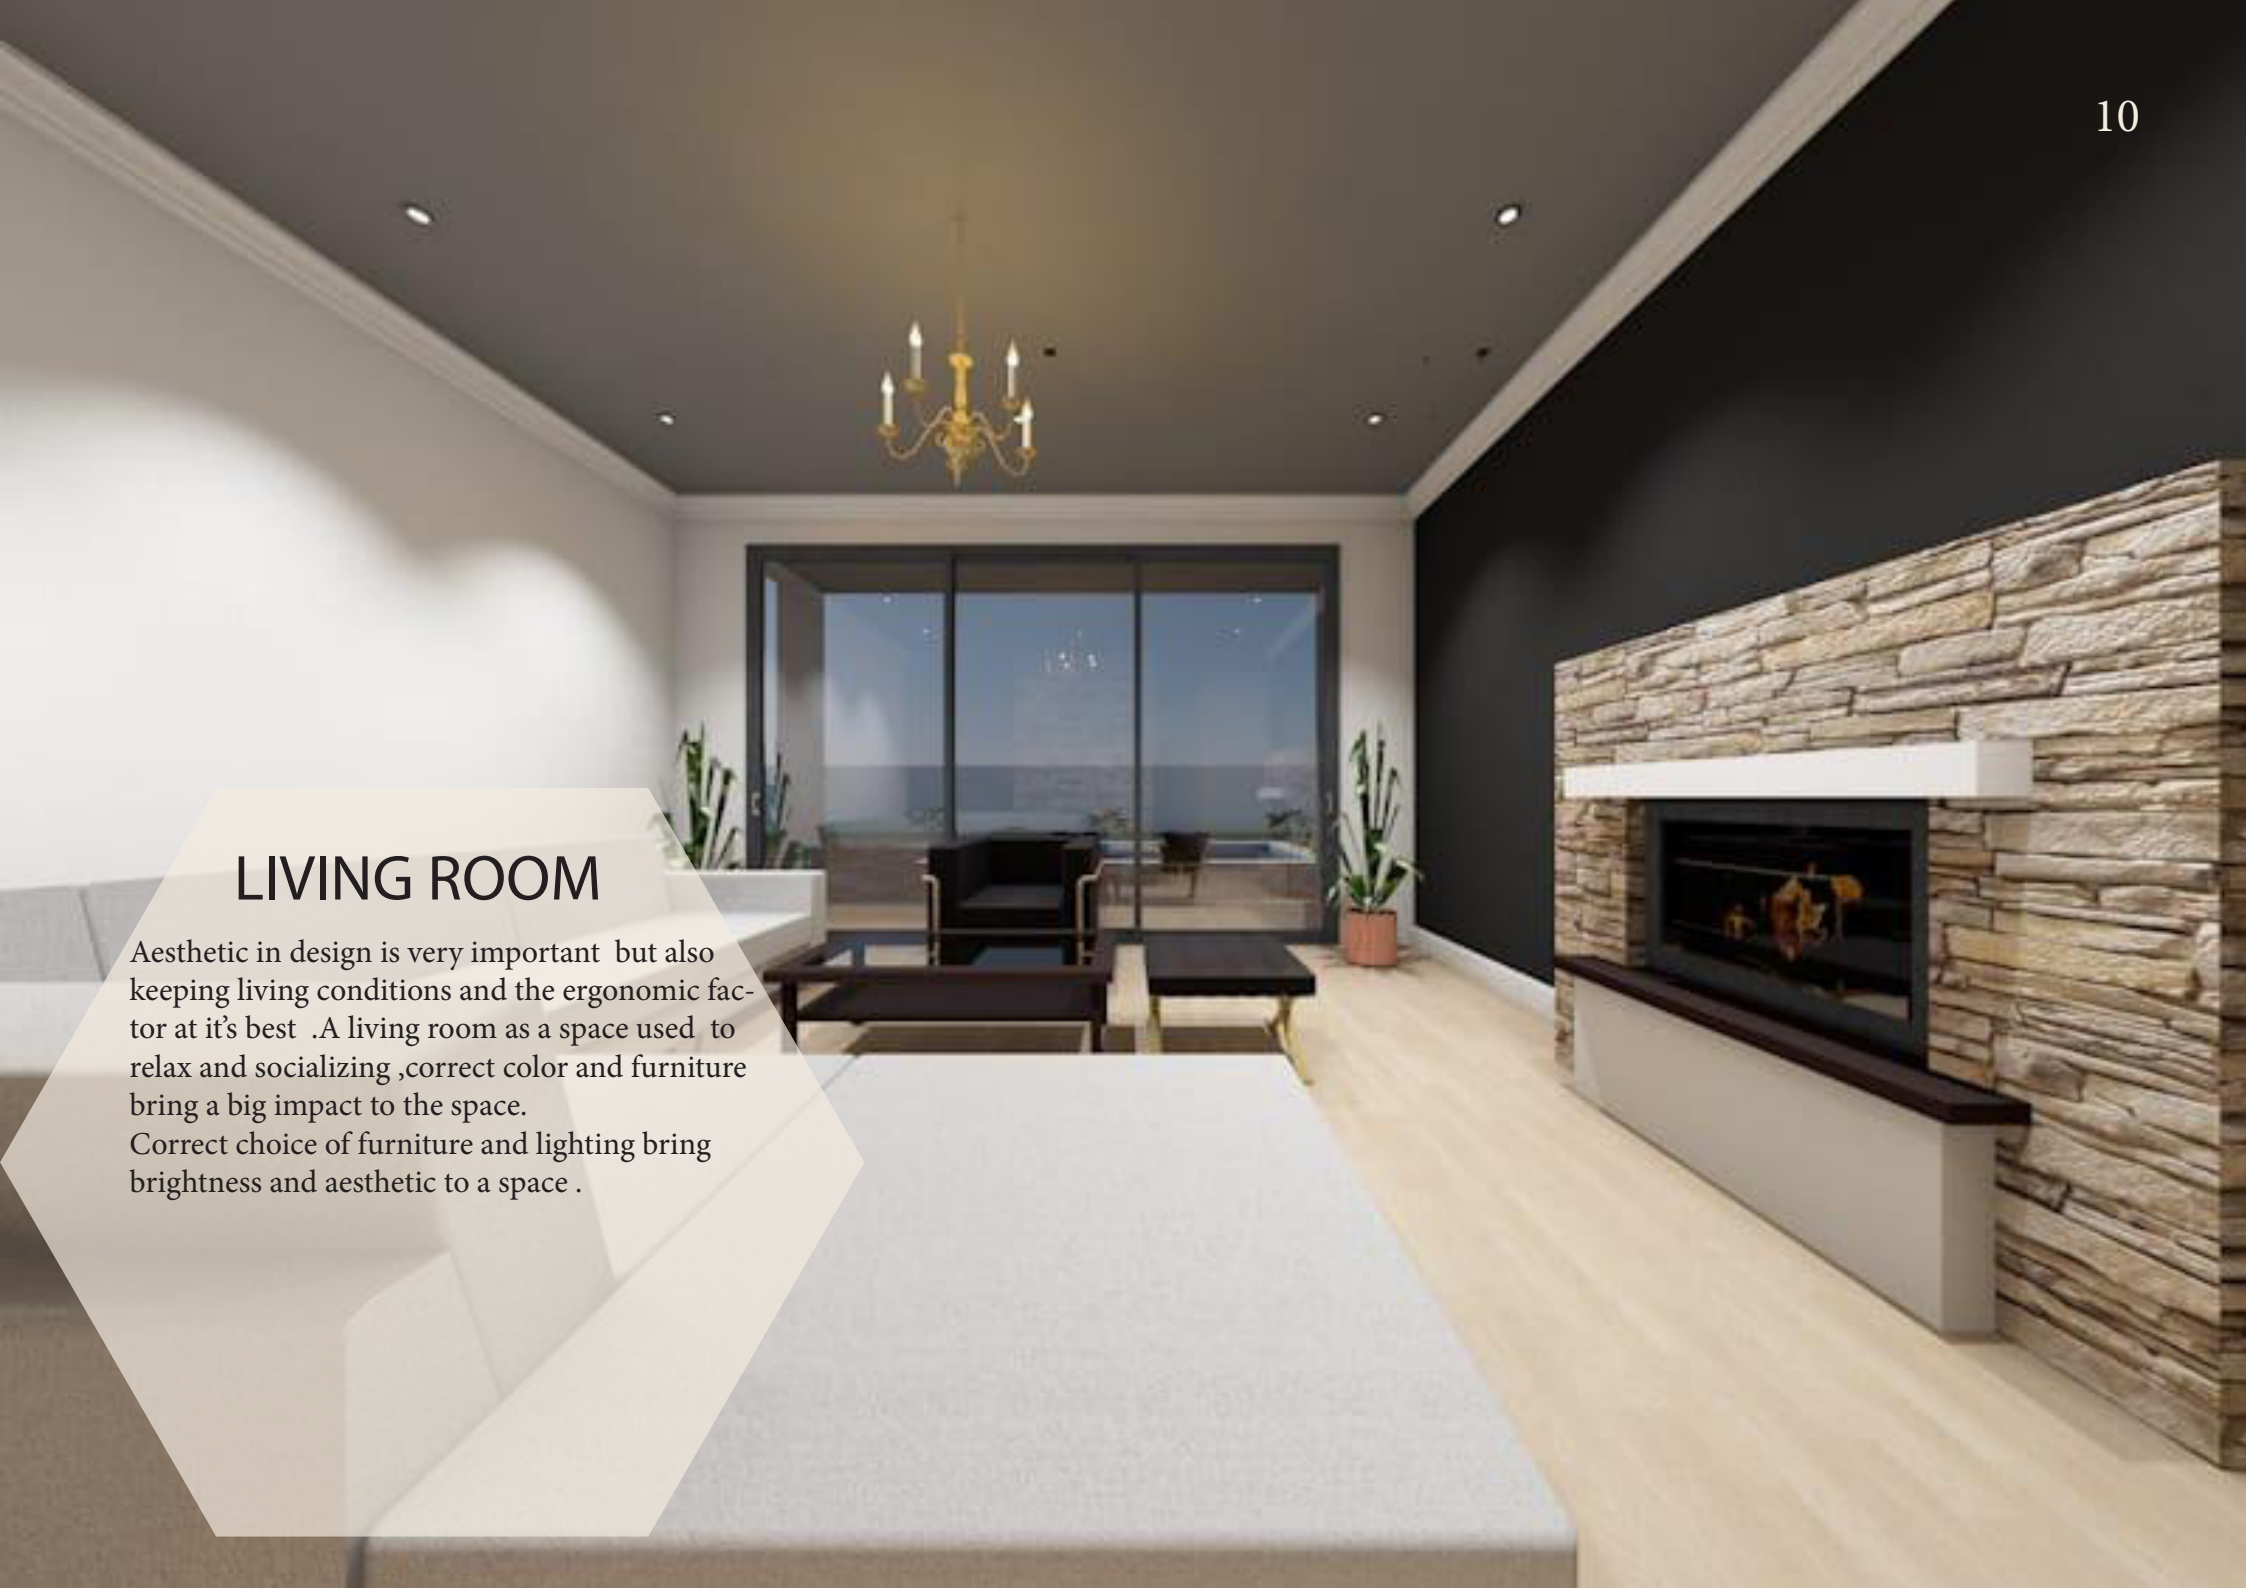

EXTERIOR

Exterior design includes your home size and shape ,how it fits into the surrounding neighborhood and streetscape and the impact it has on its site . While home design is a matter of personal taste there are practical benefits of designing your exterior as well as the landscape .

LIVING ROOM

Aesthetic in design is very important but also keeping living conditions and the ergonomic factor at it's best .A living room as a space used to relax and socializing ,correct color and furniture bring a big impact to the space. Correct choice of furniture and lighting bring brightness and aesthetic to a space .

KITCHEN

As a working space ergonomics is a good factor here .How to assign the materials to each object and the types of cabinets makes the space attractive and comfortable .

When it comes to the kitchen design white , gray ,blue,red,yellow and green really shine .Each of these shades can do something different for the room, but they can help create a warm and welcoming space .

Warm colors are believed to stimulate the appetite and are an excellent option for kitchens .

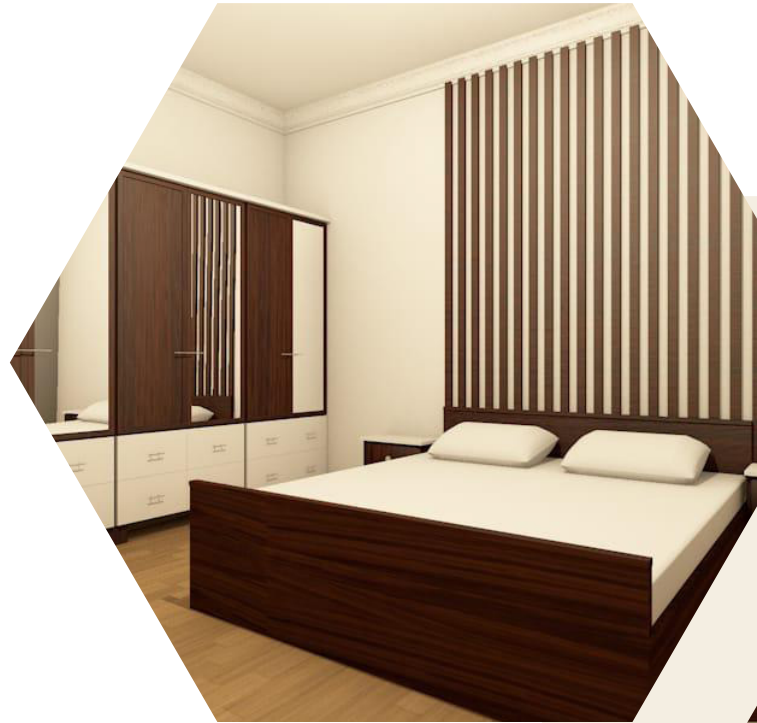

BEDROOM

There are many things to consider when one is designing a bedroom .

Color - The wall color of your bedroom can change its look completely

Lighting - One should have the correct lighting fixtures in a space to render the colors out well .

Investment on quality bedroom furniture that don't only look good but can as well support the body weight .

The window treatment also come in handy in a bedroom, having the windows placed at the right angle to avoid direct sunlight but enough light in the space .

The reason i added the wood finish was to give it a modern and rustic felling at the same time .

BATH

Your best layout will depend on the amount of space you have to work with and the needs of your household

One should use the appropriate material that may be water resistant .

For the plumbing fittings they must be done well to avoid any leaks and hence inspection must be done .

Thank you
