CLIENT TESTIMONIAL

I am glad to write a review for your capable team, you have onboard and I would like to mention another thing that your technology team are gold for your company. Thanks for everything. Soon we'll outsourcing more projects to you.

- GHIO

Lemmer, Netherlands

I am a Research Director for a company in the UK which monitors company's customer service and provides feedback on their performance and shows benchmarking data for their continual improvement. With that background I am pleased to say that the customer service I received from you just now was excellent!

- SIMON

Super Work The application is better than I expected it to be. This was quite a fluid arrangement as I was not totally sure what I required, Abhi and the rest of his team were very patient and discussed all aspects of the project with me. Any changes I requested

- JIMMC

Scotland, United Kingdom

Very diligent and hard-working. When given sufficient information, were able to produce a good-quality product in a quick time. Would use them again.

- DAVID

United Kingdom

Outstanding work even with some of the last minute changes they coded the program changes without any problems.

- ROSSK

New York, United States

Amit and team did a superb job, and did much more than they were required. Communication is very professional. Recommend these guys every time. I will use again.

EMPIRE
NAME: Cyber Infrastructure Pvt Ltd
SPECIALTY: Custom software development
BUDGET TURNED: US\$ 10 million
NUMBER OF EMPLOYEES: 300

Cyber Infrastructure put its first product, Kaliyan Kandal and Abhishek Parashar at their office.

Success saga of 3 IT entrepreneurs

HT Correspondent

■ [HTCorrespondent@htmedia.com](#)

INORE: Three young IT entrepreneurs from Hyderabad who started their own company with a staff of two are back to technology after getting out of college. "We got our first clients, a client who wanted similar software and a client for website development," he says.

From 2002, 17-year-olds started working for them. The founders will still be involved every day. "When we started our business, we had no money. We spent our savings and borrowed heavily to start the project in India. Then gradually the bigger projects started coming in. Early last year we were there in 2000 employees and now we have 3000," says Kaliyan Kandal and Abhishek Parashar.

They are looking for cyber cafes to offer their software and services. "The software is unique. It's a multi-layered security solution and hence we believe the company's quality is appreciated by our clients," says Anil Agarwal.

Currently, their focus is on web application development, e-commerce and other mobile platforms like Android. "We are aware of a market demand for mobile phones and hence we are focusing on mobile application development," says Anil.

Going forward, they want to move to mobile devices and mobile applications.

They are also looking for opportunities in the future to expand their business.

"But they always had a dream of doing something out of the ordinary. After working for about two years, they left their job and decided to give shape to a company.

"They started working for them and they were always supportive," Anil said.

The management in which both

al built up a company in seven years," says Kaliyan.

Says Kaliyan, "With a team of 300 professionals at Indo-US and European locations, CIS has perfected its services in the major areas of the software development, customer support services, offshore staffing, 1000 service and USA nationwide staffing services."

Company's founders Al Patel, Anil Agarwal, 29, and Kaliyan Kandal, 27, both from Manipur Institute of Technology (MIT) like any youngster, they started with a computer and a few books.

"At that period internet was something that made headlines," said Kaliyan. The software was later marketed by an Australian company and gradually, they started getting more clients. "We are currently working on some big projects while getting accustomed to marketing strategies of the outsourcing world. That is what helped them develop

around 2,000 employees company in 2007.

It is a golden
