

About 20 years ago Joshua lost his job, their house and their one vehicle. He applied for bankruptcy in 1998 and ever since that day he struggled from one part-time opportunity to the next, as nobody would hire a person with a bad credit record on a permanent basis. This was a requirement in those days just after Nelson Mandela came to power.

They could not even qualify for a bank account. Him and his wife eventually moved into a granny flat at the back of a property in 2010 and he then started making some money by doing wood work, making all kinds of stuff. from bird feeders to work benches. The items sold very slowly. Money ran out and he could not afford the materials to carry on.

At the age of 60 he applied for a small Old Age Pension from the government which did not pay much. Needless to say, Joshua then experienced a major setback with pneumonia ( He has COPD and Chronic Bronchitis ) and was bed ridden for 3 months after suffering a mild stroke in July 2021 where he could not move or breathe properly.

His wife had to do everything and he did not have any medical insurance. He could not afford any of the state hospitals or the medical Doctors and had to rely on our small pension to buy the medication needed. Joshua and his wife who lives in a wooden granny flat needs your help with their monthly expenses. With his medical disability he is in need of daily medication on a permanent basis. They are both pensioners with only one small pension. Any support will greatly be appreciated.
