

# Curriculum Vitae

(English - short version - 08/Sept/2017)

**Name:** Alessio Guzzi

Born in Rovigo the 13th July 1969

Rovigo is a small town (population of abt 50.000) located in Northern Italy, not far from Venice

([Google maps link to my home in Rovigo here](#))

**Age:** 48

**Education:** High School Diploma of Expert in Industrial Mechanics - Technical Industrial Institute - Rovigo

**Main skill:** data analysis and problem solving of management and technical related issues.

**Work experience** positions (summary):

- 1) Data Entry, System Administrator, Software developer
- 2) Modular chilled room designer, quote maker, and customer's supply chain manager.
- 3) Self Employed - providing full IT (Information Technology) services for SOHO customers
- 4) Customer's orders management and production manager
- 5) Entrepreneur - Shareholder, director and manager of small food and beverage outlet

**Work experience** in details (just the more significant):

(1989) *Employed at Lambdacolor Srl* (company mission: construction and maintenance of building's technological systems, such as electrical system, water systems, gas pipelines, sewerage systems, heating and refrigeration systems)

Position: Data Entry, System Administrator, Software developer (I designed an application that calculate selling prices and format a quote text document), Training of employees to the use of the management and quoting software available

Note: as it was a small company (less than 15 employees) I actually have been able, and sometimes I've been required, to join each of the company activities, at least to get some knowledge that could be useful for quoting or management.

(1997) *Employed at Incold SpA*

Position: designer of modular chilled room, quote maker, and customer's supply chain manager. I have been trained on the use of their dedicated and integrated CAD/Quoting/Store\_management system

(1999) *Self employed*

Mission: Provide full IT (Information Technology) services for SOHO customers

Deployment, maintenance, phone assistance and repair of: OS, HW (PC and peripherals), networking, telephony and Internet; developing of dedicated data management solutions and training courses.

(2006) *Employed at Europrint Srl* (company mission: desktop publishing, offset printing and binding)

Position: Customer's orders management and production manager; define orders workflow, management of prepress tasks, check of orders paper requirements and paper availability at company store, set paper orders to suppliers if needed, schedule the print and bind tasks.

Note: When I was hired, I had no knowledge at all about offset printing, binding, and papers. I actually haven't been trained and I found myself alone to handle the "company life" (the previous and only manager resigned) while still in a run to acquire the basic knowledge as fast as possible. At the same time, I have developed a dedicated relational database to switch from the previous "all paper" based management system to a real-time, fully accessible, flexible and reliable IT based management system.

(2012) *Running own small company in Malaysia* (company name: Elixir Approach Sdn Bhd, company mission: selling traditional italian icecream, espresso coffee, beverages, waffles, crepes)

Position: Shareholder, director and manager

Note: company outlet located inside 1st Avenue Mall in GeorgeTown, Penang. Business ran on licensee agreement with Gelatomio Sdn Bhd. The outlet business were operated by two shift of workers that I personally interviewed, hired, trained. Everything related to the business was on my duty as the second, Malaysian, director was always vacant.

Personal skills: Since I was a kid my main ability and interest was to disassemble everything, inspect and investigate the components functions, then reassembly. That turned out to be my main skill. I'm used to apply the "disassemble,investigate,reassemble" process to every activity, environment, relation and task I am involved.

That's the sturdy foundation of my problem solving skills.

Languages: Italian (mother language), English ([upper intermediate level](#))

Additional informations: Along the years I've learned how to use and I actually used hundreds of different software applications; the more complex I used were about 3D modelling and animation ([some animations can be viewed on my website](#)). I also have been involved on the making of few video clips (filming, analog to digital conversion, video and audio editing).

My interests, range from mechanics, electronics, information technology, programming languages, to economy, psychology, politics, religions.

I also had attended a couple of University courses: one was about Italian private rights laws, the other about a subject called Political economy. I successfully passed the final exam of the Political economy course.

I've been drafted in the army for one year. My assigned roles were assault soldier and weapons maintenance technician.
