Alessio Guzzi
Detailed list of Information technology related knowledge and experiences (last update 8 Sept. 2017).

about 25years knowledge gained.
about 13 years worked as free lance/self employed to provide wide IT assistance to my own costumers and as third party costumer service.
Services provided on deployment, maintenance and repair of: OS, HW (PC and peripherials), networking, telephony and Internet

Wide range programming skills gained; in order of learning:
BASIC (C64), Assembler 6502, LISP, DOS scripting, XENIX SH scripting, C#, Filemaker scripting (till v.6), HTML, Java, Macromedia Flash scripting (till v.4), AutoIT scripting, VBscript

Operative Systems with deep knowledge (SOHO usage):
DOS, all Windows OS, Android

Operative Systems with good to average knowledge:
MacOS 9 (and earlier), OS X, Linux

Years of experience about computer components, add-on cards (either controllers, video capture, communication, network interface cards), and peripherials; either PC compatible or Apple compliant.

Side knowledge acquired about image, sound, and video editing; 3D modelling and animations.

Recently more involved on Android OS (apps, mods and fixes), networking and Internet connection troubleshooting, virus troubleshooting.

On 2015,
I developed a tiny app for Android (see here)
I published a few videos about how to fix one particular Android Google app problem (see here)

On 2016,
I published a tutorial about Android app package decompiling, reverse engineering, modification (see here)
I moved to Philippines two years ago.

My own web site (not really designed to be sort of "visiting card") where I saved and published some of my works
www.controsensi.it

Tech posts published by me with user name "halnovemila" are available at the forum sites listed below (posts topic described within brackets):
VR-Zone (Moderboard HW modding)
VisualBasicScript.com (programming)
The New Rebels Haven (CPU microcode injection - BIOS modding)
virtualbox.org (networking with Virtual Machines)
Compiz Community Forums (old threads have been removed so actually my post is not anymore available)
Comodo (Defense+ proactive settings)
AMD (Ati driver binary patching)
XDA developers forum (mods, hints, tricks for Android OS mainly related to Samsung Galaxy Y phones)

Hardware Upgrade (Italian language only)
Most significative posts published on Hardware Upgrade forum:
All about graphics card ATi HD3 850 AGP (Power comsuption, performance, cooler noise, modding) 1, 2, 3, 4, 5, 6
Video memory mapping and 4GB boundary case study 1
Bus-bound Graphics performance case study 1, 2, 3, 4, 5, 6

Thank you for your courtesy and consideration.I look forward to your response.
Regards
Guzzi Alessio
