# Gift Product qty and price modification

Site: https://www.monbonkado.com

- On this site a client has a **special requirement for** adding gift products to a cart.

- While adding to a cart, if **product price is greater than 150**, the **cart should be splitted** with the same products, each having a maximum 150 price.

- **For example**, if the **actual price of the product is 400**, then **3 products should be added to the cart with prices of 150,150,100** respectively. **The task was challenging.** According to the client, **this task can't be done by their 3 previous developers. We have done it.**
