## Portfolio

### Technology and Experience Stack (High Level)

.Net: 13+ Years  
C#: 13+ Years  
Sql Server : 13+ Years  
MVC / Entity Framework: 5+ Years  
Angular 1 / 2 / 4/ 5: 4+ Years  
Javascript / JQuery: 12+ Years  
HTML5 / CSS3: 4+ Years  
API: 4+ Years  
Bootstrap: 6+ Years  
Azure / AWS: 4+ Years  
Source Control (VSTS, SVN, VSS, Git): 13+ Years  
Window's development experience: 8+ Years

### Payment Gateways worked

Firstdata  
Stripe  
Paytogether  
Claqandpay(ACI world wide)  
Paypal  
Authorize .Net  
Cybersource

### Couple of client list for reference check.

Sandow  
iAspire  
Tentacle Solution (UK)  
Fritzys  
eGenuity  
GoToKiosk  
Perrimed  
Mixnet

## iAspire

iAspire is an employee evaluation app based software. iAspire has already added several custom question types, such as a signature, hidden questions for pre survey questions.

Some of the iAspire features:

1. Your customized evaluation forms
2. Walkthroughs, rubrics, peer coaching
3. Any type of evaluation form
4. Instantly send evaluation feedback
5. Take pictures and video recordings
6. Increase communication to teachers

**Technology:** Asp.Net,C#,SQL Server,Microsoft Azure Cloud Hosting, PhoneGap, MVC, RESTApi, Infragistics, HTML5, CSS3, Design Patterns, Azure, SVN, AngularJS

Live site [here](#)

## iAspire Reflect

Upload video's using Azure Media Services and automatically share these videos with the appropriate principal, coach, or other educator. Use Videos for Self-Reflection, Peer Collaboration, Virtual Coaching and Evolution.

1. My Videos section stores all of your own submissions. A Shared with Me section provides you access to all videos that have been shared with you.
2. Engage in dialogue per video to provide commendations, recommendations, or reflective questions
3. Create your own in-house video library
4. Add tags to your videos, such as questioning techniques, checks for understanding, and engagement strategies
5. Automatically share your videos with the appropriate staff (principal, coach, etc) or manually share with other educators from across your organization.

**Technology:** Asp.Net,C#,SQL Server,Microsoft Azure Cloud Hosting, PhoneGap, MVC, RESTApi, Infragistics, HTML5, CSS3, Design Patterns, Azure, SVN, AngularJS, Azure Media Services

## NEWBEAUTY<sup>®</sup>

THE BEAUTY AUTHORITY

When BeautyDNA launched in 2014, the goal was to change the way you experienced beauty. Mission accomplished.

Now, we are excited to announce that NewBeauty—the beauty authority—with their knowledge, expert insight and access to the latest products will launch a new, innovative program in early 2017.

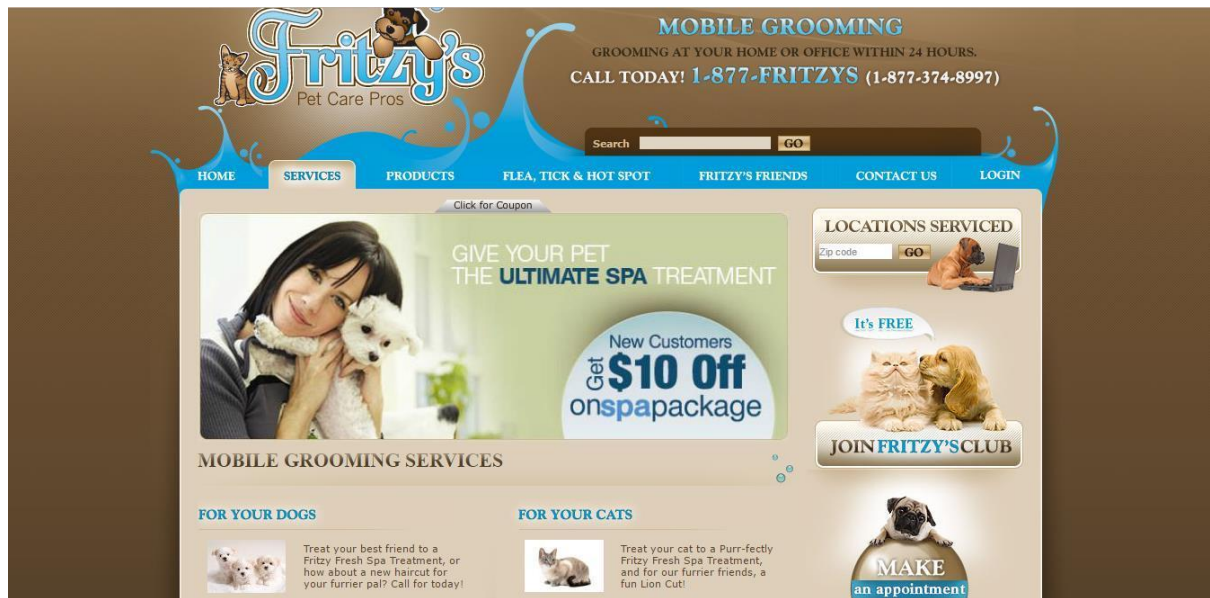

As BeautyDNA is no longer accepting new subscribers, we encourage you to join

## Fritzys Pet Care

Mobile Grooming for Cats and Dogs.

**Technology:** ASP.Net 4.5, MVC5, SQL SERVER 2014, JQuery, HTML5, CSS3, AngularJS

## Boomerang Automated Car Parking System

Boomerang is an automated robotic parking garages and automated self-storage systems. The product make the impossible possible by solving storage and parking problems. Boomerang's automated parking systems is the ability to fit more cars in less space which can solve parking problems. By contrast, automated parking garages are a green solution since they preserve open space, have low energy consumption and have no carbon emissions, because vehicles are shut off before being parked in the system.

This solution was developed with touch screen kiosk hardware based on Intel ATOM processor industrial PC. The kiosk is designed to work on various flavours of Windows OS such as Windows XP, WIndows Vista, Windows XP Embedded, Windows 7

**Technology:** .Net Framework 3.5, VB .NET, ADO .Net, SQL Server 2008, WCF, AJAX, UML, Java Script, Visual Source Safe, Design Pattern, TFS

## QuestFork

This project is related to Retail Chain management. The Extraction, Transformation & Loading (ETL) sub-system of QuestFork works as the name suggests is to extract data from various transaction processing applications, transform them to a compatible format and load into QuestFork data warehouse. Different applications store data differently. Accordingly QuestFork provides for different mechanisms to extract data from applicator databases. The different data retrieval mechanisms provided by QuestFork are:

- Direct retrieval of data through database access through .Net SQL Client or .Net OLEDB
- Data retrieval through SOAP XML Request
- Retrieval of data through APIs

The data is shown in an interface in form of Reports & Dashboards.

**Technology:** Visual Studio 2005, .Net Framework 2.0, C#, Asp .Net, ADO .Net, SQL Server 2005, Windows 2003 Server, HTML, .Net Advantage Infragistics 7.3, TFS

## Spot the Ball

It's a one type of gambling system. In this user can register on system and buy a credit for ball and place the ball on image. The admin can decide the winning position and declare the result.

In this have also one more game like a Win Abode, in this user can register on system, give the answer of question, select the number of credit and then goes to payment process if success then the user register with him credit.

In this system, we have used 3 different types of payment gateways

1. First Data
2. Paytogether
3. ACI Universal Payment

System will provide email functionality with dynamic html email template and send to client.

Registration verification is done through email.

System will also provide different types of reports like winner\_detail, winner\_secure, view\_client\_history etc with download file in csv format.

**Technology:** Asp.Net, C#, SQL Server, HTML5, CSS3, FirstData Payment API, Paytogether, ACI Universal Payment
