Hello! Am Owen Kazembe.

I am a graphic designer from StarLight Media. I have been involved in a broad variety of projects in a number of years and I have learnt a lot from all these projects. I dedicate my time to improving my skills and I keep my mind open for any new skills and softwares that can be used as the world is ever changing and improving. Me and other two friends have created StarLight Media, a registered business mostly involved in Photography and Graphic Design. We also dedicate our time everyday to learning about business, the business world and how we can go about improving our relationships with our clients. We hope to add more services to our company including videography. Working together as a team helps us meet clients' demands and expectations.

I have trained and improved my skills in Photoshop, InDesign, Illustrator and Lightroom. My experience with clients has given me deeper understanding of the business as a whole and has shown me areas of improvement.
