IMPACT WATER'S WORK

Scaling access to safe drinking water in schools and health facilities throughout Africa

www.impactwater.co

Impact Water delivers high-social-impact and affordable **water treatment technologies**, and long-term maintenance to developing country schools. By end of 2018, over 8,000 schools are benefiting from our solutions every day. That's about 3.6 million students enjoying the benefits of safe drinking water.

Impact Water also offers a credit facility to schools struggling to afford cash payments. We believe access to water treatment technologies should not come at a high cost. Barriers to adoption must be knocked down. Making safe drinking water solutions affordable is key. Our ability to leverage carbon financing further reduces costs which in turn allows for more schools to benefit.

OUR PRODUCTS

Aquatabs
water purification tablets

100 liters of water treated per tablet

ULTRAFLO

180,000 liters of water treated

ULTRAPRIME

Up to 450 liters of water treated per hour

"With Impact Water we have saved quite a lot and improved our health. The drinking water by Impact Water is safe."

Mrs. Rehema Nakibuuka
Headmistress, Nkumba Junior

Impact Water's contribution to the SDGs

Impact Water contributes to the SDGs by making it possible to have safe drinking water in schools (SDG 6), which advances student health and well-being (SDG 3), and, ultimately, supports student attendance and a better quality education (SDG 4).
